Education

University of Central Florida | B.S. Computer Science

Expected Graduation Date: Fall 2021

Skills

Java, Python, Javascript, HTML, CSS, Git, Node.js, React.js, Vue.js

Work Experience

Android Developer | University of North Florida | February 2018 – September 2018

- Worked with a student and professor to develop an Android app for another professor. I was charged with making GET and POST requests to a JSON API developed by a fellow professor.
- Built in Android studio using Java.

Web Applications Developer | UCF Center for Distributed Learning | September 2019 - Present

- Added new endpoints to an existing Python API maintaining test coverage of 100%.
 - Contributed to an open source React application that assists instructors in developing rich and interactive course content for students.
 - Collaborated with teammates to resolve issues across multiple projects.
-

Projects

[UCFParking-API](#)

- Designed an API/website that returns a JSON response containing information about each parking garage. Data is automatically added to a database every hour and can be visualized with a line graph.
- Hosted on Heroku built with Python (Flask), Vue, JavaScript, HTML, CSS, and a MongoDB database

[Tweet-Tracker](#)

- Built a website that tracks the occurrences of a given keyword on Twitter in real time using web sockets
- Hosted on Heroku with a backend in Python (Flask), frontend built using React.js, Redux, CSS, JavaScript, and TypeScript

[MotionPy](#)

- A motion detection system running on a Raspberry Pi 3. When motion is detected, a picture is saved and a notification is sent to an Android app.
- Server is running on a Raspberry Pi 3 using Python (Flask), Android app built using Java and Kotlin, images saved to a Firebase database
